CASCON: Instructions for hands-on Deep Learning Workshop

Mohammad Gasmallah and Jason Lam

October 28, 2019

Prior to the hands-on tutorial at CASCON please perform the following steps to download the necessary packages and data.

1. Please create a Google account and go to `https://colab.research.google.com/notebooks/welcome.ipynb`

2. In the top right corner press *File* and *New Python 3 Notebook*

3. Copy and paste the following commands into a sell

   ```
   !pip install tensorflow-gpu==2.0.0rc
   !pip install graphviz numpy tqdm matplotlib --no-cache-dir
   tf.__version__
   ```

4. press the "play" button on the side of the cell and make sure you see **2.0.0-rc0** as the output of the cell
